Under the leadership of the esteemed President, significant opportunities are being created in our prosperous state for the use of highly efficient modern technologies in the construction industry, which will accelerate the socio-economic development of the country in the new era of state prosperity, as well as create all favourable conditions for the successful development of business. Currently, much attention is being paid to the development of all areas of the construction complex of the state, including strengthening the material and technical base of the raw materials industry and creating conditions for the development of local production through the most effective use of the available potential in this area of activity.

ABOUT US

ABOUT US

ES “Ak Bulut”, a member of the Union of Industrialists and Entrepreneurs of Turkmenistan, founded in 2015, is the first enterprise in Turkmenistan to start production of suspended ceilings and profile systems. The production facility for suspended ceilings and profile systems is located in an industrial zone near the city of Ashgabat. The workshop occupies 10 000 m² of closed area. Today the company has a production capacity of 4,000,000 m² of suspended ceilings and 7,000 tonnes of galvanised metal profiles and profile fittings per year, as well as a newly opened plant in Lebap region on an area of 30 hectares, where the production workshop occupies 20,000 m² of closed area with an annual production capacity of 4,000,000 m² of plasterboard, 50,000 tonnes of dry construction mixes and 60,000 tonnes of construction gypsum.

The company is a stable manufacturer of various suspended ceilings and profile systems in the region.

ES “Ak Bulut” has fully implemented a digital system, and thanks to the use of the most advanced technologies, our work is done quickly, our products are environmentally friendly, and communication with our domestic and foreign partners is fast and reliable.

DIGITAL SYSTEM

MAIN GOALS AND OBJECTIVES OF ES “AK BULUT”

- To produce high quality products.
- Increase the number of business partners both inside and outside the country.
- Increase the qualification and education of employees to produce high quality products.
- To be known in the world market as a manufacturer of the most reliable, high-quality and affordable products.
- To promote our products under the brand "Made in Turkmenistan" all over the world.
- Fully provide the domestic market with our products and displace the goods that are sold for "red" money.
- Fully implement digital technologies in our economic community.
- To create jobs in the most remote regions of the country, at the moment in the ES "Ak Bulut" employs about 200 employees.

To achieve these goals and objectives, ES “Ak Bulut” has every opportunity.

NEW PROJECT OF ES "AK BULUT" JOINTLY WITH THE MINISTRY OF INDUSTRY AND CONSTRUCTION PRODUCTION OF TURKMENISTAN "TURKMEN GYPSUM".

Since the beginning of 2023, with the approval of the President of Turkmenistan, ES "Ak Bulut" together with the Ministry of Industry and Construction Production of Turkmenistan have started to implement a new project. The joint economic company "Turkmen Gypsum" was established.

The site is located in Lebap region, Koytendag district, in the vicinity of the town of Dostluk. The territory is 10 hectares.

NEW PROJECT OF ES “AK BULUT” JOINTLY WITH THE MINISTRY OF INDUSTRY AND CONSTRUCTION PRODUCTION OF TURKMENISTAN "TURKMEN GYPSUM".

This place was not chosen by chance. The main basis for the production of gypsum plasterboard and dry construction mixes is raw material, more precisely gypsum stone. The deposits of gypsum stone in the quarries near Dostluk can ensure production for many years. The gypsum stone itself is characterized by its purity and transparency.

It was also strategically important that an international railway line runs close to the company. A branch line of the international railway will be connected to the site. Goods trains from here will go to Ashgabat, Tashkent and Dushanbe, which will make it possible to sell products both within the country and export them abroad.

PLASTERBOARD AND DRY CONSTRUCTION MIXES

ANNUAL PRODUCTION CAPACITY

- 250 000 tones of dry construction mixes
- 20 million square meters of plasterboard
